

In this section we will be using the following from "Measuring Angles"

	<p>Vertical Angles are Congruent</p> <p><math>\angle 1 \cong \angle 2</math> and <math>\angle 3 \cong \angle 4</math></p>
	<p>Complementary Angles sum to 90.</p> <p><math>m\angle 1 + m\angle 2 = 90</math></p>
	<p>Supplementary Angles sum to 180</p> <p><math>m\angle 3 + m\angle 4 = 180</math></p>
	<p>Straight Angle or a <u>linear pair</u>. Angles 1 and 2 form a straight angle so they are supplementary and have a sum of 180.</p>
